GMAT Timeline Selector Worksheet

Diagnostic Score Gap Calculator, Weekly Availability Multiplier & Mock Milestone Schedules

1. The Diagnostic Gap & Timeline Selector Matrix

Choose your optimal timeline based on your baseline diagnostic score and target score differential.

Score Gap (Target – Diagnostic)	Weekly Available Hours	Recommended Prep Timeline	Feasibility & Strategy Description
20 – 40 Points (e.g. 645 -> 685)	15 – 20 Hours / Week	30-Day Intensive Sprint	High feasibility; focus purely on test mechanics, pacing, and 2-3 weak areas
50 – 80 Points (e.g. 605 -> 675)	12 – 15 Hours / Week	60-Day Balanced Plan	Recommended for most working professionals; allows concept rebuild and 6 mocks
90 – 140+ Points (e.g. 555 -> 695)	12 – 15 Hours / Week	90-Day Foundation Master Plan	Essential for major foundation overhauls; covers ground-up math and verbal logic
150+ Points (e.g. 505 -> 705)	15 – 20 Hours / Week	120-Day Extended Plan	Multi-phase transformation; required for non-STEM candidates targeting top 1%
Any Gap (>60 Pts) with <8 hrs/week	5 – 8 Hours / Week	Minimum 90 to 120 Days	Do not rush; low weekly hours require prolonged calendar duration to avoid burnout

*Formula: Estimated Prep Hours Needed = (Target Score - Diagnostic Score) * 2.5 hours.*

2. Comparative Timeline Execution Schedules

Side-by-side comparison of milestone phases across 30, 60, and 90-day timelines.

Preparation Stage	30-Day Sprint Schedule	60-Day Balanced Schedule	90-Day Foundation Schedule
Diagnostic & Strategy Audit	Days 1 – 2 (Mock 1 & error log)	Week 1 (Mock 1 + skill inventory)	Week 1–2 (Mock 1 + foundational math review)
Concept Mastery & Theory	Days 3 – 12 (Targeted weak spots only)	Weeks 2 – 4 (Core arithmetic, CR, DI)	Weeks 3 – 6 (Exhaustive concept rebuild from scratch)
Timed Application & Drilling	Days 13 – 22 (Sectional timed sets)	Weeks 5 – 6 (Medium/Hard problem sets)	Weeks 7 – 9 (High-volume timed sectional drilling)
Full Mock Testing Cadence	Days 23 – 28 (Mocks 2, 3, 4 every 2 days)	Weeks 7 – 8 (Mocks 2–5 weekly)	Weeks 10 – 12 (Mocks 2–6 every 4–5 days)
Tapering & Test Day	Days 29 – 30 (Formula refresh, rest)	Final 3 Days (Error review, rest)	Final 5 Days (Error log reading, mental peak)

Rule: Never schedule your official exam without completing at least 4 official GMAC practice exams under timed conditions.

3. Mock-Test Milestone Benchmarks

Target milestones to evaluate whether you are on track to meet your test day goal.

- 30-Day Plan Milestone: By Day 15, your score on Mock 2 should show at least 50% of your targeted score gain.
- 60-Day Plan Milestone: By Week 4, your error rate on medium-difficulty questions across all sections should drop below 15%.
- 90-Day Plan Milestone: By Week 8, you should achieve your target scaled score in at least two of the three sections.
- Emergency Brake Rule: If your score on Mock 4 (taken 10 days before exam) is >40 points below your goal, postpone the exam by 3 weeks.
