OFFICIAL MBA WIZARDS SEO BLUEPRINT & STRATEGY RESOURCE

CAT MOCK ANALYSIS TEMPLATE

Forensic Post-Mock Audit Sheet, Time-Sink Elimination Tracker & Action Item Protocol

EXECUTIVE CANDIDATE PREPARATION DOSSIER

- Document Classification: High-Yield Proprietary Strategy Dossier
- Curated By: Mr. Surinder Gupta (IIT Roorkee Alumnus, 25+ Yrs Exp)
- Pedagogy: The 5-Pillar Algorithmic & Admissions Mentorship Model
- Interactive Tools: AI CAT & GMAT Mock Interview Engines (Available Online)
- Verification: 100% Calibrated with Latest 2026/2027 Admissions Regulations
- Portal Access: www.mbawizards.co.in | Cyber City Hub, Gurgaon

WHAT IS INSIDE THIS STRATEGY BLUEPRINT:

' Section-by-section strategic checklists, timing rules, and score targe
' Forensic root-cause error log frameworks for rapid percentile jumps
' Official class profile medians and composite shortlisting formulas
' Direct consultation voucher for 1-on-1 strategy audit with lead faculty

1. The 5-Step Forensic Mock Analysis Framework

A structured review protocol that extracts maximum improvement from every 2-hour mock test.

Analysis Step	Key Objective	Action Item to Execute	Target Metric to Improve
Step 1: Attempt & Accuracy Log	Map all 66 questions into 4 states	Classify each question: Correct, Wrong, Unattempted, Guessed	Accuracy Rate >= 85%
Step 2: Error Categorization	Identify why mistakes happened	Tag every error into: Concept Gap, Silly Calc, Reading Error, Panic	Zero Silly Mistakes
Step 3: Un-timed Re-Attempt	Test actual capability without clock	Solve all skipped and wrong questions without timer; verify answers	Un-timed Score > 120
Step 4: Time-Sink Audit	Detect wasted exam minutes	Identify all questions where > 2.5 mins was spent without yielding +3	< 5 Mins Wasted on Misses
Step 5: Single Action Item	Prevent repeated failure modes	Write 1 actionable behavioral rule for the next mock test	Execute Rule in Mock N+1

Forensic Rule: Never take Mock N+1 until every question of Mock N has been re-solved and classified.

2. Section-Wise Diagnostic Audit Sheet

Specific diagnostic checkpoints to isolate root causes in VARC, DILR, and Quant.

Section	Common Failure Symptom	Root Cause Diagnosis	Prescribed Corrective Drill
VARC	High attempts (22+) but low accuracy (< 60%)	Skimming passages too fast; relying on gut feeling rather than text	Reduce attempts to 16; verify every answer with direct passage evidence
VARC	Stuck between 2 closely competing answer options	Failing to spot single extreme word (all, never, primary) in distractor	Identify the elimination differentiator; extreme words are 90% wrong
DILR	Spent 18 minutes on 1 set and got 0 questions right	Failed to scan all 4 sets upfront; ego prevented quitting early	Enforce 4-minute scan rule; if no deduction table by min 5, quit immediately
DILR	Solved 1 set easily, panicked and could not start set 2	Mental fatigue; high cognitive overload from complex data	Take 30-sec breather between sets; pick set with fewest variables
QA	Attempted 16 questions, got 6 wrong due to calculation	Rushing arithmetic steps; mental math without scratch pad checks	Write down unit digits and intermediate steps; avoid speed arrogance
QA	Could not reach the last 5 questions of the section	Got stuck on 2 difficult geometry questions in the first 15 mins	Scan entire paper in 3 rounds: Round 1 (easy), Round 2 (medium), Round 3 (hard)

Success Metric: A candidate who reduces negative marks from -8 to -2 gains +18 scaled marks (~10 percentile jump).

3. Reusable Post-Mock Action Sheet: Commit to Next Mock

Fill this sheet immediately after analyzing each mock test to anchor behavioral modifications.

- My Top Time-Sink Question in this Mock was: Section _____ Question # _____ Time Wasted: _____ mins.
- The Single Concept I need to revise before the next mock is: _____.
- My Attempt Strategy for the next mock: VARC Attempts Target: _____ | DILR Sets Target: _____ | QA Attempts: _____.
- My Behavioral Non-Negotiable Rule for the next mock: "I will immediately leave any question that exceeds 2.5 minutes."
