2. Forensic Error Log Template: The 4-Bucket Root Cause System

High scorers never repeat the same mistake twice. Categorize every wrong answer into one of 4 diagnostic buckets.

Question ID / Source	Topic / Concept	Bucket Category	Root Cause Analysis	Corrective Action Tal
OG Quant #142	Remainders & Modulo	1. Concept Gap	Did not know rule for remainders when dividing negative numbers	Re-studied number properties chapter; solved 15 practice problems
OG DI #48 (DS)	Inequalities & Absolute	2. Trap / Fallacy	Assumed x was an integer; statement (1) allowed fractional values	Wrote warning on flashcard: NEVER assume variables are integers
OG Verbal #89 (CR)	Weaken the Argument	3. Execution / Reading	Misread word "least likely" as "most likely" in question stem	Underline question stem keywords before reviewing answer choices
Mock 2 Quant #18	Work-Rate Equations	4. Time Pressure Panic	Spent 3.5 minutes brute forcing; panicked and guessed incorrectly	Instated 2-minute hard rule: if no clear path, eliminate and move on
Mock 3 Verbal #14	RC Inference	3. Execution / Reading	Picked choice with extreme word "invariably" not stated in passage	Rule: GMAT inference choices must be conservative and bulletproof

Audit your error log every Sunday. If any topic appears 3+ times, pause mock tests and return to conceptual basics.
