CAT Study Plan for Working Professionals

Micro-Session Scheduling, Fatigue Management, Weekend Deep-Work Blocks & Mock Analytics Protocol

1. The 15-Hour Sustainable Weekly Timetable for Corporate Aspirants

Protect your energy by studying before work and scheduling heavy problem-solving on weekends.

Day of Week	Morning Block (6:30 AM -	Commute / Lunch	Evening / Weekend Deep
Monday	QA: Arithmetic Concepts & 10 Drills	1 Aeon Essay reading on phone	Error log review of previous week (30m)
Tuesday	VARC: 2 RC Passages + 3 Para Summaries	Vocab roots & mental math flashcards	Rest / Light work wind-down
Wednesday	QA: Algebra / Equations Drills	Formula sheet quick review	3 DILR puzzle setups untimed
Thursday	DILR: 1 Timed Set (12 minutes)	1 Philosophy / Sociology RC passage	Rest / Mental recovery
Friday	QA / VARC Weak-Area targeted fix	Review missed questions from week	Light prep; sleep 8 hours for weekend
Saturday	FULL 2-HOUR PROCTORED MOCK TEST	Break & physical exercise	3-Hour Forensic Mock Post-Mortem Audit
Sunday	3-Hour DILR & QA Deep Practice Block	Afternoon family / personal time	2-Hour Sectional Drill + Next Week Planning

STRATEGIC PRINCIPLE: Golden Rule: Morning study sessions have 3x higher completion rates than evening sessions after exhausting workdays.

2. Cognitive Energy & Fatigue Management Heuristics

Tactics used by working 99th-percentile achievers to maintain peak retention alongside demanding jobs.

Workplace Reality / Hazard	Traditional Trap to Avoid	High-Yield MBA Wizards
Late evening client overtime	Forcing 2 hours of bleary-eyed math at midnight	Shift bed-time 1 hour earlier; study fresh at 6 AM
Weekend burnout & exhaustion	Cramming 10 straight hours on Sunday	Two focused 3-hour blocks with a 2-hour exercise/nature break
Long daily office commutes	Passive social media scrolling / reels	Active podcast listening or RC article reading on mobile Kindle
Workplace travel / business trips	Pausing preparation for entire weeks	Carry physical printed 20-question practice pack in briefcase

STRATEGIC PRINCIPLE: Consistency Metric: 14 hours per week for 30 weeks beats 35 hours per week for 6 frantic weeks every time.

3. The 4-Hour Mock Post-Mortem Protocol for Busy Professionals

Because your study time is limited, mock analysis must be twice as thorough as mock taking.

- Hour 1: Un-timed Re-attempt. Re-solve every unattempted or incorrect question without looking at solutions.
- Hour 2: Error Classification. Categorize into Concept Gaps, Question-Selection Mistakes, or Silly Calculation Errors.
- Hour 3: Benchmark Strategy Review. Calculate how many marks were lost on sets you should have skipped immediately.
- Hour 4: Action Plan Update. Schedule 2 specific 45-minute micro-drills during the upcoming workweek to fix root causes.
